CONFIDENTIAL

Executive

14 November 1950

Management Officer

Realignment of the Intelligence Staffs in the Office of Special Operations.

- 1. The Assistant Director recommends in the attached memorandum the centralization of three staff activities under one head. (Intelligence Integration Division, Information Control Staff, and Technical Guidance Staff) This will reduce by two the number of officials reporting to the Assistant Director.
- 2. Under the present organisation there is no individual except the Assistant Director whereby conflicting priorities, requirements and intelligence direction can be resolved. The proposal would place these responsibilities largely on the Chief of the new Staff who would be responsible to give direction and establish priorities for the intelligence effort of the Office as relates to the production of National Intelligence Estimates. Tab A indicates present functions of the activities recommended to be transferred to the new Staff.
- 3. Management Staff concurs with the proposal and the addition of two positions with the recommendation that after 30 days of operation under the new organization Management Staff be directed to re-examine to determine if the new organization is efficiently organized administratively.

Executive, CIA

6 November 1950

Assistant Director for Special Operations

Re-alignment of the Intelligence Staffs in the Office of Special Operations

- 1. Authority is requested to establish an Intelligence Staff in OSO on the level of the four principal Staffs now in Existence, i.e., Staffs A, B, C, and D.
- 2. For security reasons it is proposed that the new Staff be named Staff D in lieu of the present Staff D, which will become known as Staff E. This proposal to rename the present Staff D to Staff E stems from a previous recommendation of the CIA Budget Officer, who suggested that the existence of this Staff not be revealed to the Budget Bureau in annual budget presentations.
- 3. The establishment of this new Staff activity in OSO, centralised under the immediate control of ADSO, can better provide intelligence direction and coordination of requirements to headquarters and field units than has hitherto been possible. It is proposed to consolidate in this Intelligence Staff the three presently existing units, i.e., the Information Control Staff, Technical Guidance Staff, and the Intelligence Integration Division.
- 4. Since it is believed essential to implement this activity at the earliest possible date, the following action is recommended:
 - a. The establishment of two new Departmental positions as follows:

Chief, Staff D - GS-15 Intelligence Assistant, Staff D - GS-7

- b. Transfer of the Information Control Staff, Technical Guidance Staff and the Intelligence Integration Division, in their present form and strength, to the new Staff D.
- 5. The first responsibility of the new Chief of Staff D will be to study the present problems of intelligence direction in OSO and recommend changes relating thereto from both procedural and organisational viewpoints.
- 6. This is to certify that funds are available from other OSO allotments to cover the cost of the two additional positions requested.

SIGNE	

25X1

Stated below are the general functions of the activities recommended to be transferred to the new Staff. Some duplication of administrative activities is noted by this Staff.

Technical Guidance Staff

- 1. Receipt of requirements for scientific and technical information.
- 2. Assignment of collection action to Foreign Divisions.
- 3. Dissemination of information received.
- 4. Maintenance of records.

Information Control Staff

- 1. Receipt of requirements for non-technical information.
- 2. Assignment of collection action to Foreign Divisions.
- 3. Control of reporting procedures.
- 4. Dissemination of information received.
- 5. Maintenance of records.

Intelligence Integration Division

- 1. Responsible for coding, abstracting, filing and maintaining all intelligence received by Office.
- 2. Collating information from files to answer requests.
